## **Gen Re Intermediaries Integrates RiskMeter Online into its MapPML Application**

Stamford, CT, February 4, 2008 ... Gen Re Intermediaries (GRI) announced today the integration of RiskMeter Online, a real-time, natural hazard risk report service of CDS Business Mapping, LLC, into GRI's MapPML, a proprietary web-enabled catastrophe management tool used to evaluate and map risks as well as assess catastrophe risk premium adequacy.

"One of Gen Re Intermediaries' top priorities for 2008 is to continue to expand the functionality of our MapPML product to further assist our clients in their efforts to improve their portfolio of property risks," says Berto Sciolla, President of Gen Re Intermediaries. "With the integration of RiskMeter Online into GRI's MapPML, our clients have the ability to run over 30 real-time, natural hazard risk reports on a single U.S. location, enabling GRI's clients' underwriters to make more informed decisions in assessing and pricing risks."

"A driving characteristic of Gen Re Intermediaries is their pursuit of underwriting excellence for their clients," explains Dan Munson, Founder, RiskMeter Online. "We are honored that Gen Re Intermediaries has turned to the RiskMeter Online to assist in this. We will be there with them every step of the way."

For more information about this collaboration, please contact Berto Sciolla, President, Gen Re Intermediaries Corporation at [bsciolla@genreint.com](mailto:bsciolla@genreint.com) or 203 328 6565 or Daniel Munson, Founder, RiskMeter Online at [dmunson@cdsys.com](mailto:dmunson@cdsys.com) or 617 737 4444.

###

*Gen Re Intermediaries is a subsidiary of General Re Corporation, a Berkshire Hathaway Company. It is a Stamford, Connecticut based reinsurance intermediary and risk advisor that specializes in delivering global reinsurance market solutions coupled with state of the art risk management analytics. This expertise allows us to help Property and Casualty insurance companies optimally manage their catastrophic loss exposure. As a high quality boutique, we offer a full array of risk management solutions for the Property Catastrophe, Aviation, Workers' Compensation Catastrophe and Casualty Clash exposures.*

*The RiskMeter is used by underwriters and agents to automate property lookups. The RiskMeter utilizes Internet mapping technology to enable underwriters to determine the proximity to natural hazards for any property in the United States. The RiskMeter is far more accurate and faster than any other method of property lookups, and can save underwriters considerable time and money. The RiskMeter performs many types of lookups, including distance to coast, windpool eligibility, rating territories (company specific), proximity to brush, earthquake information, flood zones and others.*
