New Lava Flow Report Introduced to Underwriters & Agents

Boston, Ma. - April 2005 - CDS Business Mapping, LLC a leader in online hazard mapping, is now offering Hawaii Lava Flow reports on its RiskMeter Online Web site (www.RiskMeter.com). By simply typing in an address, underwriters and agents will receive a detailed report that returns: potential lava flow score, volcano name, GIS map and aerial photo (optional).

On the Island of Hawaii certain areas are prone to volcanic lava flows. The RiskMeter's Lava Flow report leverages historic and prehistoric data to provide agents and underwriters with a clear picture of how much risk a policy is exposed to. In addition, this report takes into account the larger topographic features of the volcanoes, which will affect the distribution of lava flows.

Until now, determining whether a new or existing policy location was prone to destruction from lava flows, required underwriters and agents to flip through paper based maps. Not only was this process time consuming and error prone, but it took underwriters and agents away from their core functions: writing new business and selling. This revolutionary report has solved this problem. For more information on this cutting-edge report, please contact Daniel Munson at 617.737.4444 or dmunson@cdsys.com

About RiskMeter.com

For property underwriters and agents who are looking to increase accuracy, productivity and overall speed of operations, the RiskMeter Online (www.RiskMeter.com) is an Internet application used to automate property risk reports. By simply typing in an address users can

get back natural hazard information for a given policy location. The RiskMeter can perform more than 30 different lookups, including distance to coast, rating territory, flood zone, windpool eligibility, proximity to brush and EQ hazards. Unlike conventional paper-based lookups, the RiskMeter Online provides you with accurate, efficient and defensible positions up to 90% faster than existing methodologies. For more information, please visit www.RiskMeter.com or call 1.800.746.7797

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. CDS is dedicated exclusively to the creation and implementation of mapping solutions using GIS (Geographic Information Systems) technology. In addition, CDS provides a full line of mapping software, mapplication development services, Internet mapping development, training and consulting. Based upon client requirements, CDS can provide on-site consulting, customize software for particular applications, or create custom maps on a service basis. For more information, please visit www.cdsys.com or call 1.800.746.7797
