RiskMeter's Distance to Fire Station Report Goes National

Boston, MA, August 2006 - CDS Business Mapping, LLC., a leader in online property risk mapping, today announced RiskMeter's Distance to Fire Station report now provides national coverage. This means users have the ability to get: *drive distance to responding fire stations, names of the stations and staffing* for any location in the United States.

"The main benefit of RiskMeter's Distance to Fire Station Report is that users will now be able to get the premiums they deserve," explains James Munson, Director of Consulting Services, CDS Business Mapping. "This report takes the guess work out of determining a policy's fire protection, by leveraging cutting-edge routing technology to determine the closest fire station(s). In some cases it's possible to see a \$600 increase on a single homeowner's policy," says Munson.

The distance between a property and the primary fire station directly affects an insurers' loss ratio. Regardless of the training, personnel or equipment at a station, if an insured location is greater than five miles from a station, the chance of a large loss is inevitable. For more information, please contact James Munson at 860.854.6125 or jmunson@cdsys.com

About RiskMeter.com

For property underwriters and agents who are looking to increase accuracy, productivity and overall speed of operations, the RiskMeter Online (www.RiskMeter.com) is an Internet application used to automate property risk reports. By simply typing in an

address, users can get back natural hazard information for a given policy location. The RiskMeter can perform more than 30 different lookups, including distance to coast, rating territory, flood zone, windpool eligibility, proximity to brush and EQ hazards. Unlike conventional paper-based lookups, the RiskMeter Online provides you with accurate, efficient and defensible positions up to 90% faster than existing methodologies. For more information, please visit www.RiskMeter.com or call 1.800.746.7797

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. CDS is dedicated exclusively to the creation and implementation of mapping solutions using GIS (Geographic Information Systems) technology. In addition, CDS provides a full line of mapping software, application development services, Internet mapping development, training and consulting. Based upon client requirements, CDS can provide on-site consulting, customize software for particular applications, or create custom maps on a service basis. For more information, please visit www.cdsys.com or call 1.800.746.7797
