RiskMeter's Distance to Fire Station Report Now Covers Every State East of the Mississippi

Boston, MA, May 2006 - CDS Business Mapping, LLC., a leader in online property risk mapping, today announced AR, KY, NM, OK, TN, and UT have been added to the RiskMeter Online's (www.RiskMeter.com) Distance to Fire Station Report. This brings the total number of states to forty-one!

This cutting-edge report uses routing technology to determine the distance to the *three* closest fire stations. By simply typing in an address, RiskMeter Online users can get a detailed report that returns drive distance to responding fire stations, names of the stations and staffing. What once was an error prone and time-consuming process can now be done in a matter of seconds.

“Regardless of the training, personnel or equipment at a station, if an insured location is greater than 5 miles from a station, the chance of a large loss is inevitable,” explains James Munson, Director of Consulting Services, CDS Business Mapping. “This report will immediately verify the distance from responding fire stations, and more importantly, it will help carriers decide early in the underwriting process whether a location is protected or not.” For more information, please contact James Munson at 860.854.6125 or jmunson@cdsys.com

About RiskMeter.com

For property underwriters and agents who are looking to increase accuracy, productivity and overall speed of operations, the RiskMeter Online (www.RiskMeter.com) is an

Internet application used to automate property risk reports. By simply typing in an address, users can get back natural hazard information for a given policy location. The RiskMeter can perform more than 30 different lookups, including distance to coast, rating territory, flood zone, windpool eligibility, proximity to brush and EQ hazards. Unlike conventional paper-based lookups, the RiskMeter Online provides you with accurate, efficient and defensible positions up to 90% faster than existing methodologies. For more information, please visit www.RiskMeter.com or call 1.800.746.7797

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. CDS is dedicated exclusively to the creation and implementation of mapping solutions using GIS (Geographic Information Systems) technology. In addition, CDS provides a full line of mapping software, application development services, Internet mapping development, training and consulting. Based upon client requirements, CDS can provide on-site consulting, customize software for particular applications, or create custom maps on a service basis.
