FOR IMMEDIATE RELEASE:

New RiskMeter Tool Enables Agents, Brokers & Underwriters to Process Schedules

Boston, MA, June 2007 - CDS Business Mapping, LLC a leader in online hazard mapping, today announced it has added a batch processing feature to its RiskMeter Online (www.RiskMeter.com) real-time, natural hazard risk report service. This new feature enables underwriters, agents and brokers to run schedules through the RiskMeter Online themselves anytime, anywhere.

With the new RiskMeter Online batch processing tool, users can obtain natural hazard risk reports without having to type in individual addresses, resulting in substantial time savings and increased productivity. All of the RiskMeter Online's reports are available, including distance to coast, flood zone determinations, wind pool eligibility, brush fire scores and much more. Furthermore, because no human intervention is required by RiskMeter, schedules can be run at any time of day, any day of the week. With the addition of the batch feature to the RiskMeter Online, users simply upload their schedules on our Web site and they will receive an Email with their policy exposure results a few hours later.

"In today's competitive insurance industry, timing is of the essence" explains Dan Munson, Founder, RiskMeter Online. "RiskMeter's new batch tool will enable underwriters, agents and brokers to be more competitive and win more business by turning around submissions quicker. In addition, it will also help underwriters to

streamline their underwriting process by reducing manual submissions.” For more information, please contact Dan Munson at 617.737.4444 or go to:

About RiskMeter.com

The RiskMeter is used by underwriters and agents to automate property lookups. The RiskMeter utilizes Internet mapping technology to enable underwriters to determine the proximity to natural hazards for any property in the United States. The RiskMeter is far more accurate and faster than any other method of property lookups, and can save underwriters considerable time and money. The Risk Meter performs many types of lookups, including distance to coast, windpool eligibility, rating territories (company specific), proximity to brush, earthquake information, flood zones and others.

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. The company offers a full line of mapping software, data and applications for insurers. CDS Business Mapping also specializes in natural hazard risk assessment tools and data and is dedicated to the creation and implementation of mapping solutions for the insurance industry.
