RiskMeter's New Flood Elevation Report Goes Live in Thirty Three States

Boston, MA, September 2006 - CDS Business Mapping, LLC., a leader in online property risk mapping, today announced RiskMeter Online's (www.RiskMeter.com) new Flood Elevation report is available for the following states: AL, AZ, CA, CO, CT, DC, DE, FL, GA, ID, KY, LA, MA, MD, ME, MS, NC, NH, NJ, NM, NV, NY, OR, PA, RI, SC, TX, UT, VA, VT, WA, WI and WV. Within the next few weeks, CDS will upload the remaining states for national coverage.

“After the events of the 2005 hurricane season and the recent floods in the northeast, many insurers learned that floods don't stop at the edge of a flood zone,” explains Dan Munson, VP of Sales & Marketing, CDS Business Mapping. “In order to give our users a better idea of their flood exposure and to help them to minimize their flood losses, we made it a priority to add a report that combines flood and elevation data,” says Munson. By simply typing in an address, users will now be able to get the following information:

- ◆ FEMA Flood Zone
- ◆ Distance to Flood Zone
- ◆ Estimated Base Flood Elevation
- ◆ Elevation at a Location
- ◆ Estimated Height Above a Flood Zone
- ◆ Estimated Water Depth in a Flood Zone
- ◆ Aerial Photo (Optional)

“The most common natural disaster in the United States is flooding,” says Munson. “Every state is susceptible to flooding and this problem will only get worse due to new land development and changes in weather patterns and topology. RiskMeter’s flood elevation report is the perfect tool for underwriters to dig deeper when it comes to evaluating flood risk. Furthermore, this report will also benefit insurance agents by allowing them to sell more flood insurance to people who live outside a flood zone.” For more information on this report, please contact Daniel Munson at 617.737.4444 or dmunson@cdsys.com

About RiskMeter.com

For property underwriters and agents who are looking to increase accuracy, productivity and overall speed of operations, the RiskMeter Online (www.RiskMeter.com) is an Internet application used to automate property risk reports. By simply typing in an address, users can get back natural hazard information for a given policy location. The RiskMeter can perform more than 30 different lookups, including distance to coast, rating territory, flood zone, windpool eligibility, proximity to brush and EQ hazards. Unlike conventional paper-based lookups, the RiskMeter Online provides you with accurate, efficient and defensible positions up to 90% faster than existing methodologies. For more information, please visit www.RiskMeter.com or call 1.800.746.7797

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. CDS is dedicated exclusively to the creation and implementation of mapping solutions using GIS (Geographic Information Systems) technology. In addition, CDS provides a full line of mapping software, mapplication development services,

Internet mapping development, training and consulting. Based upon client requirements, CDS can provide on-site consulting, customize software for particular applications or create custom maps on a service basis. For more information, please visit
