FOR IMMEDIATE RELEASE:

New Hawaii Tsunami Report Added to RiskMeter Online

Boston, Ma. - March 2005 - CDS Business Mapping, LLC a leader in online hazard mapping, is now offering Hawaii tsunami reports on the RiskMeter Online (www.RiskMeter.com). By simply typing in an address, users will be alerted if the address falls into a high risk area, as well as receive a report that returns: **GIS Map, Island Name, Official Map Number and Official Map Name.**

“In the state of Hawaii certain coastal territories are prone to tsunamis. In the past determining whether a policy fell into a high risk area required an underwriter to refer to outdated paper based maps,” explains Dan Munson, VP of Marketing & Sales. “This process was extremely time consuming and error prone. With the RiskMeter Online’s new tsunami report, users can find out within a matter of minutes if an address falls into a high-risk area. This feature not only saves valuable time, but it enables users to boost their bottom-line, by allowing their underwriters to concentrate on writing and their agents to focus on selling.” For more information on this revolutionary report, please contact Daniel Munson at 617.737.4444 or dmunson@cdsys.com. In addition, Oregon Tsunami reports are also available, and California and Washington are coming soon.

About RiskMeter.com

For property underwriters and agents who are looking to increase accuracy, productivity and overall speed of operations, the RiskMeter Online (www.RiskMeter.com) is an Internet application used to automate property risk reports. By simply typing in an address users can get back natural hazard information for a given policy location. The RiskMeter can perform more than 30 different lookups, including distance to coast, rating territory, flood zone, windpool eligibility, proximity to brush and EQ hazards. Unlike conventional paper-based lookups, the RiskMeter Online provides you with accurate, efficient and defensible positions up to 90% faster than existing methodologies. For more information, please visit www.RiskMeter.com or call 1.800.746.7797

About CDS Business Mapping

CDS Business Mapping, LLC., was founded in 1994 as a desktop mapping sales and consulting company. CDS is dedicated exclusively to the creation and implementation of mapping solutions using GIS (Geographic Information Systems) technology. In addition, CDS provides a full line of mapping software, mapplication development services, Internet mapping development, training and consulting. Based upon client requirements, CDS can provide on-site consulting, customize software for particular applications, or create custom maps on a service basis. For more information, please visit www.cdsys.com or call 1.800.746.7797
